Thank you. The first one will be Joe Wiley of Sadat Associates. He is trying to put together a consortium with Don Jon Marine and Enova Geo (a geomembrane that can be used for capping).

Sorry Steve.

Absolutely, send them to Steve:

Stephen W. McGee | Vice President, National Program Manager Sediments Practice

| Cell: 440.522.6936

steve.mcgee@tetrattech.com

Tetra Tech | Industrial & Sediments Program

Thanks.

Juan

Subject: Vendor calls

I'm afraid I've been fielding calls from various vendors with technology/expertise/etc... related to dredging/capping/remediating the Passaic.

So far, I have successfully deflected them by telling them that it is too early in the process to meet with them. Unfortunately, a few are being more persistent now about getting in contact with whoever is doing the design.

Is there someone on your team whose contact info I can give the more persistent vendors?
